Installation instructions of fiber optic operating platform

1 Install the fixing plate behind the fusion splicer with screws (M3/ M4/ M5).

2 Insert the support plate into the fixing plate and tighten the fixing screws.

3 Place the cooling tray in the corresponding position of the support plate, and the installation is completed.

4 After placing the fiber cleaver on the operating platform, adjust the depth of the screw so that the rubber pad fits the cleaver completely.

5 Pull the bracket vertically to the bayonet, and then pull it horizontally to support the machine on the table. (This step can be ignored for medium and large machines)

6 Now, the bracket installed on the fusion splicer for placing the cleaver and the cooling tray is installed.

Installation completion effect
